THE FACTS ABOUT FH BONN PRODUCTS

- **F.H. BONN PADS AND COVERS ARE USED BY ORIGINAL EQUIPMENT MANUFACTURERS (OEMS).**

When the original equipment manufacturers design a new press, they come to F.H. Bonn to assist them in developing pads and covers that give the fit and finish engineered into their equipment. Our relationship with the OEMs does not end with the sale of their press. Working together, we are constantly striving to make a good product even better.

- **ALL F.H. BONN PRODUCTS ARE MANUFACTURED WITH OUR CUSTOMERS IN MIND.**

At our state of the art manufacturing facility in Springfield, OH, we strive to work with the very latest in equipment, thereby assuring our customers receive superior quality products. Our full-time research and development personnel are constantly looking for ways to improve existing products, as well as introducing new ones.

- **ALL F.H. BONN FABRICS HAVE QUALITY AS WELL AS LONGEVITY BUILT IN.**

By using superior quality materials, your customers are assured of receiving merchandise that outperforms other products that might be available to them. We pay attention to things like fabric thread counts and resin finishes, two processes that add to the overall value of our product line. Whether it's cover cloth or flannel, bag material or thread, F.H. Bonn works with only the best.

- **F.H. BONN IS THE ONLY COMPANY THAT USES A TWO-STEP SEALANT PROCESS ON ALL AIR BAGS.**

At F.H. Bonn we not only seal the seams on our air bags with silicone, we pre-treat our air bag material with a sealant to insure air tightness. This two-step process assures your customer of working with air bags that not only last longer, but give a superior finish as well.

ORDERING INSTRUCTIONS FOR DRY CLEANING AND LAUNDRY

1. If your press is used for dry cleaning, go to the table of contents for dry cleaning. If your press is used for laundry, go to the table of contents for laundry.
2. Determine the manufacturer and model number of your press.
3. Determine the appropriate type of press. For instance, an Ajax/American press could be a cabinet bosom or sleeve press, or a flatbed press. A flatbed press is also commonly known as a hothead press.
4. Go to the page specified for the type of press you have.
5. Presses are listed in order, first alphabetically — for any presses which do not have numbers in the model — then numerically, for presses which have numbers in the model.
6. Decide which covers and/or pads would best fit your needs. Cover and pad choices are marked along the top of each section. If you are in doubt about which cover or pad to order, your FH Bonn representative or a customer service manager will be happy to assist you with your selection.
7. For Dry Cleaning Presses and Cabinet Presses, determine the Bonnco code Number which is in boldface type.
For some models listed in our Laundry Section, you will need to add the boldface prefix letter designator to the Bonnco Index Number (See example below).
8. Phone, FAX, E-mail, or mail your order to us.

LAUNDRY

UNIPRESS FLATBED PRESSES

MFG. MODEL NUMBER	BUCK SIZE	DESCRIPTION	BONNCO INDEX NUMBER	COMBO		COVERS		PADS		TEX-STEEL STEEL BASE PAD*
				BON-PAK COVER/ PAD BP	ARAMID COVER/ PAD BT	BON-SPUN B	HI-SPUN HS	50 OZ. BONN-E-BLUE HB	30 OZ. BONN-E-BLUE FB	
3-TZ	19 1/2 x 8 12 x 7	Collar Cuffs (2)	72** 20**							TS-465 (Set of 3)
3TZP	19 5/8 x 9 12 x 11 x 7	Collar Pleat Cuff - Left Pleat Cuff - Right	1185 1193 1194							TS-566 (Set of 3)

If your customer requires a complete set of pads and covers for a **3TZP** Collar and Cuff machine, you will need to order a **B-1185** and **HB-1185** for the Collar, a **B-1193** and **HB-1193** for the Left Cuff, and a **B-1194** and **HB-1194** for the Right Cuff.

**FH BONN PRESS CHECK CHARTS**

The following pages contain a copy of a sample FH Bonn Press Check Chart. This sales tool is helpful in many ways. Please distribute copies of the blank document on page 8 to all of your sales representatives for their use.

BENEFITS OF USING THE FH BONN PRESS CHECK CHART

- ✓ The FH Bonn Press Check Chart allows you to inventory the pressing machines at all of your accounts. This inventory, along with a cataloging of the correct press pads and covers, will eliminate any mistakes when ordering.
- ✓ Ordering the proper pads and covers will eliminate costly returns and restocking fees that cut into commissions and profits.
- ✓ Filling out the FH Bonn Press Check Chart and keeping a copy on file, will help your warehouse build a working inventory of pads and covers to keep in stock. Having the items that sell on hand will keep your customers satisfied and eliminate additional freight charges.
- ✓ The FH Bonn Press Check Chart will build customer loyalty, increase profits, eliminate costly mistakes, and enhance overall customer satisfaction. Please take the time to use this form and see your sales and profits increase!

INSTRUCTIONS FOR PREPARING TEMPLATES

These instructions apply to the following items:

*Dry Cleaning Pad
(BKPC and PRO)*

Grid Head Plate (MFHP)

Teflon Grid Plate (TGP)

Laundry Pad/Cover

Texsteel Steel Base Pad

1. **If possible use brown paper.**
2. **Prepare paper template.**
IMPORTANT: Turn off press and allow to cool.
 - a. Remove all coverings from bare buck or bare head (dry cleaning pad, grid head plate, etc.).
 - b. **For Dry Cleaning Pad, Laundry Pad/Cover, or Texsteel Steel Base Pad** — Place paper flat on bare buck between buck and press head.
For Grid Head Plate — Place directly over Dry Cleaning Pad or other pad/cover.
Be sure that paper is at least 2” larger, all the way around than the item to be traced. Never cut a paper template to the actual size of the buck or head plate.
 - c. Lock down the Press Head to secure the paper template.
 If the paper is not secure after locking the Press Head — Have an assistant hold the Press Head down for you or secure the paper with your forearm and press the paper around the edges with your fingers. It is then possible to trace along the indentation with a felt tip marker.
 - d. **For Dry Cleaning Pad, Laundry Pad/Cover, or Texsteel Steel Base Pad** — With the paper securely in place, outline the Buck with a felt tip marker on the underside of the paper.
For the Grid Head Plate — With the paper securely in place, outline the Press Head with a felt tip marker on the top side of the paper.
3. **Provide correct measurements to ensure proper fit.**
 - a. Select the Press Diagram from page CS 10 which most closely resembles your press.
 - b. Make a copy of page CS 10 so that you will maintain an original for future reference. Take measurements and fill in the blanks on the copy, as requested.
 - c. Cross reference buck sizes and model numbers in the appropriate section on the FH Bonn catalog.

INSTRUCTIONS FOR PREPARING TEMPLATES

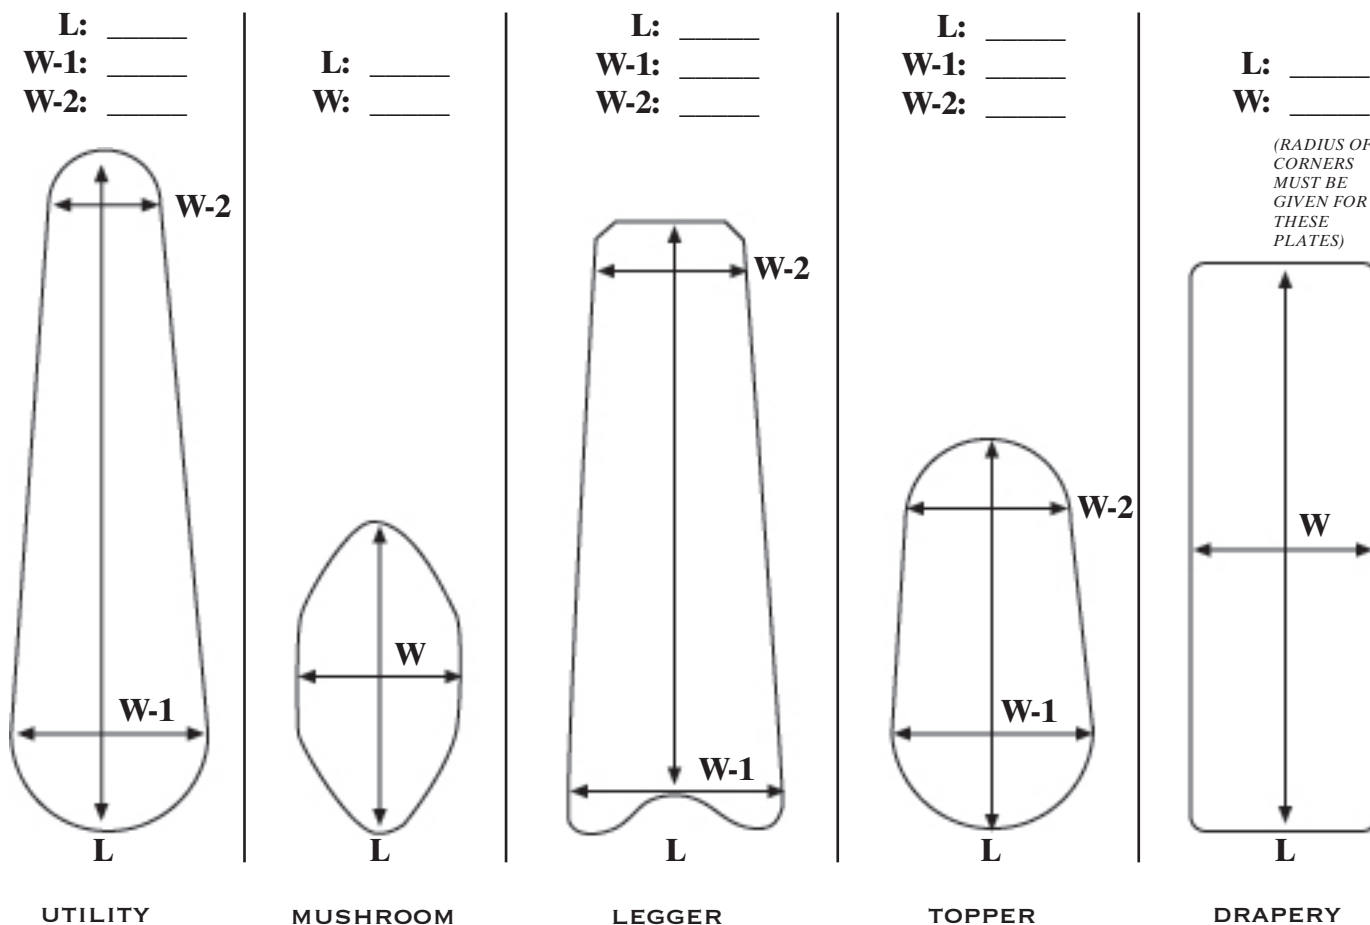

PLEASE NOTE:

Special orders which do not fit the FH Bonn standard product line, and have been custom made from specifications provided by the customer CANNOT BE RETURNED. Please take care when measuring.

W-1 should always be taken at the widest point on the presshead.

W-2 should always be taken at point where curve starts at the narrow end of the presshead.

4. **Write the following information on the paper template:**
 - a. The make and model found on the manufacturer's plate, if available.
 - b. Designate the template as "Dry Cleaning Pad, Grid Head Plate, Laundry Pad/Cover, or Texsteel Steel Base Pad"
NOTE: For Texsteel Steel Base Pad, please provide "O/S" for Over Springs, or "B/B" for Bare Buck.
5. **Include the following information when sending template:**
 - a. Customer name, address, telephone number, and designated contact person in the event that additional information is needed.
 - b. Distributor name, address, and salesperson's name.
 - c. Purchase Order Number.
6. **Send paper template, customer and distributor information, and a copy of the completed diagram below to the FH Bonn customer service department.**

**DRY CLEANING PAD INSTALLATION INSTRUCTIONS**

- 1. After removing used pad from the press, wipe off the buck with a cloth removing all debris. Blow steam through the buck to clean steam port holes (don't use vacuum).**
- 2. Lay the new pad on buck making sure the pad is evenly centered.**
- 3. Insert the spring hooks through the hem over the rod along the backside of the pad.**
- 4. Re-center the pad making sure it is even. Looking under the buck you can see if the pad is centered on the buck correctly. Lock head down.**
- 5. Draw up the cord tightly using the locking device to secure the press pad.**
- 6. Activate bottom steam for approximately two to three seconds.**
- 7. Release head and check pad to make sure it is still centered and smooth on the buck.**
- 8. Insert springs hooks on the hem and over the rod along the front side of the pad.**
- 9. Activate bottom steam again through the pad for two to three seconds and then activate the vacuum for two to three seconds.**
- 10. Tighten draw cord again with locking device.**
- 11. After three to five days, remove the front springs from the hem of the pad and tighten the draw cords again. This will insure that your new Bonn press pad doesn't slip on the press.**

RETURN POLICY: All returns must be shipped prepaid. If FH Bonn is not at fault, a 20% restocking charge will be applied to the discounted price on all goods returned. FH Bonn will accept returned merchandise within six months of the date of the original shipment ONLY. NO CREDIT WILL BE ISSUED FOR SOILED OR OBSOLETE MATERIALS OR SPECIAL MERCHANDISE WHICH HAS BEEN MANUFACTURED FOR A SPECIFIC CUSTOMER (NON-CATALOG ITEMS).

OVERVIEW

FH Bonn manufactures and provides Feed Ribbons, Guide Tapes, Pads and Covers for all of your flatwork ironer needs for Conventional, Cylinder, and European type ironers. In addition, Bonn also supplies Aprons, Attaching Accessories, Bon-Lube, Chest Cleaners, Clipper Lacing Hooks and Pins, FWI Glue, Feed and Return Drive Roll Covering, Grabmaster Belt Pullers, Wax Cloths, and Wax Lubricants.

BONTRED: Cotton ribbon with woven elastic rubber on the top surface used on small piece folders and feeders where additional traction is required. This ribbon is available in a variety of sizes and can be made to your specification.

MERCURY: Mercury Ribbons are elastic. This 2" Ribbon is available in a variety of lengths and can be cut to your exact specification. Its primary use is for folders.

NEPTUNE: Neptune Ribbons are two-ply rubber. This Ribbon comes in a variety of widths and is used on folders for traction. These Ribbons can be cut to your exact length specification.

NOVA ARAMID: Nova Return Ribbons are designed to provide superior performance in the most extreme heat applications. They are made of high temperature Aramid fabric, available in 3" or 6" widths, and can be cut to your exact length specification. Nova Aramid Ribbon is used for gas, electric, and steam ironers. Its

primary function is as a return ribbon. Bonn's Nova Ribbons are designed to provide hours of long lasting, worry free performance.

SATURN: Saturn Ribbons are made from long lasting, high tensile strength single-ply cotton. Used for feed, folder, and lower conveyor applications, these Ribbons come in a variety of widths, and can be cut to your exact length specifications. Saturn Ribbons will run true and provide excellent grip to make feeding linens easy.

VIRGO: Virgo Ribbons are made of two-ply cotton. These Ribbons are used for heavy-duty apron replacement, feed, return, or on folders. Virgo Ribbons come in a variety of widths and can be cut to your exact length specifications.

COMPRESSION ROLL COVER AND PAD: Apollo Aramid heat resistant Covers are durable and long lasting, designed to provide outstanding performance and the highest finish quality. They are made with a Venus Aramid Padding, which can be used for higher

temperature gas, electric, oil as well as steam heated ironers. Bonn Pads will not harden which allows the quicker passage of moist heat to produce a finer finish quality. Our Padding will not stretch, and will provide the consistent resiliency needed to properly finish a wide variety of linen fabrics.

For those ironers that require a two-piece Cover and Pad, Bonn offers our Comet Cover with a separate Pad made with cords for easy installation. Both the Cover and Pad are made of the highest quality Aramid materials for the best possible finish for all types of fabrics.

GUIDE TAPES: Bonn Guide Tapes come in economical Polyester (1/2" Bon-Top or 3/4" Bon-Top) or durable Aramid (1/2" Hi-Top) fabric. Conveniently packaged in 100 yard rolls, this product is easy to install and will resist snapping and tearing. Our Polyester Guide Tape can be used on all steam ironers; whereas, our Aramid Guide Tape is a must for electric, gas, or oil ironers.

RETURN DRIVE ROLL — CHICAGO DRYER

FLATWORK IRONER GLUE IS REQUIRED FOR INSTALLATION.

The table below indicates the approximate number of yards of 6" Nova Aramid belting required to cover a return ribbon drive roll. We suggest that before starting to install the belting you check the length to be sure it is approximately the length you need. This belting is also available in 3". **Please double the yardage on the chart if you wish to order 3"**

NOTE: Never use Black Grip Tape on the Return Drive Roll. Grip Tape will melt.

80 1/2" x 104" Cover (100" Rolls)				\$216.70

Be sure to specify if your ironer has steel mesh, springs, perforated plates, or if it is a solid roll ironer. If possible, furnish make, model, and serial number.

* **To order your Starlite Pads:** Carefully check the number of inches that are being used across the width of your ironer. Do not pay for padding you do not need. Most ironers use 110" of the ironing surface. For each inch over 110" of padding, add \$1.10 per inch. As an example, if your ironer uses 112" of padding, you would add \$2.20 to the price shown above.

LARGE ROLL FLAT WORK IRONER PADS

JUPITER

This Aramid Covering/Padding is a must on thermal heated ironers.

It is a 100% Aramid with an Aramid reinforcement scrim to provide stability. A good quality finish is given with no outer cover necessary.

PLUTO

This Polyester Covering/Padding is suitable for steam heated ironers. Do not attempt to use Pluto on thermal heated ironers.

It is a 100% Polyester with a reinforcement scrim to provide stability. A good quality finish is given with no outer cover necessary.

Easy and fast installation is possible because there is no need to drill holes or use clips.

OVERVIEW

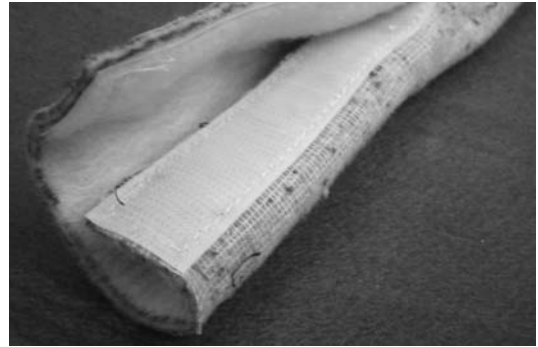

FH Bonn has numerous “miscellaneous” products that are used each day in the dry cleaning and laundry industry.

While not the typical press pads and covers, these items provide safety (Pluto Pipe Wrap, Aramid Hose Wrap, Steam Trap Shields, and Insulating Head Shields), protection (Iron Rests, Cool-Hand Poli-Sleeve Head Cleaning Mitts), and make daily tasks even easier. Iron Shoe Steam Diffusers, Aramid Head Covers, Hand Pads, and Pre-Cut Flannel for cuff and collar presses are examples of items that are also available for you to market to your customer base.

These products allow you to generate additional profits with each and every order!

BON-KNIT BUCK COVERS

Bon-Knit Buck Covers are to be used over existing buck pads.

Advantages of using Bon-Knit Buck Covers:

- 1) When the cover portion of a dry cleaning pad is worn but the padding is still resilient, a cover can be used to extend the life of the dry cleaning pad.
- 2) When the cover is heavily built up with starch, you can replace just the cover.
- 3) Cover can be removed for easy cleaning.

To order, look at the BONNCO index code number for BKPC pads and use the letters BK in front of the BONNCO Index code numbers. For example, our BONNCO Index code number for our BKPC pad for the Cissell AU-42 is BKPC-840. Our BONNCO Index code number for the BON-KNIT Cover is BK-840.

PRO-KNIT BUCK COVERS

Pro-Knit Buck Covers are to be used over existing buck pads.

Advantages of using Pro-Knit Buck Covers:

- 1) When the cover portion of a dry cleaning pad is worn but the padding is still resilient, a cover can be used to extend the life of the dry cleaning pad.
- 2) When the cover is heavily built up with starch, you can replace just the cover.
- 3) Cover can be removed for easy cleaning.
- 4) Elimination of moiré patterns and seam impressions.

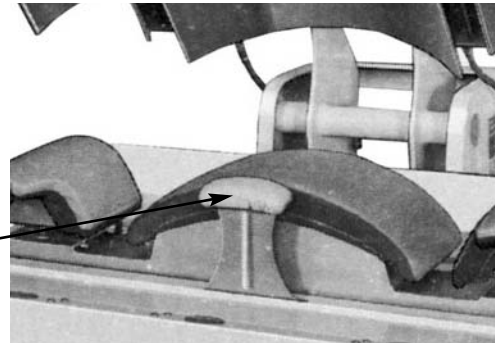

To order, look at the BONNCO index code number for PRO pads and use the letters PK in front of the BONNCO Index code numbers. For example, our BONNCO Index code number for our PRO pad for the Cissell AU-42 is PRO-840. Our BONNCO Index code number for the PRO-KNIT Cover is PK-840.

COLLAR REST COVER/PAD

COOL HAND POLI-SLEEVE

Super-tough sleeve goes a long way toward protecting operators from burn injury. Unlike imitations, Bonn's Cool Hand covers the whole length of the operator's arm when cleaning press heads. The finest product available for protection!

- Made to last — constructed of heat-resistant, fully insulated fabric and synthetic abrasive cleaning material.
- Powerful cleaning — helps keep your laundry press heads clean and free of starch buildup, preventing stains and residue on clothing to insure the highest quality pressing.
- Serves as both a cleaner and polisher, without scratching the pressing surface.

TURN OVER AND COOL HAND ALSO BECOMES A POLISHER

HAND PAD

A must-have for every work station! Steam garments safely with consistent, exceptional results.

- Protects operator – provides optimum protection from painful burns during steam pressing.
- Durable construction – superior heat and wear resistance stands up to daily hard use.
- Uniform results – even surface helps produce a finish that will keep your customers satisfied and loyal.

DESCRIPTION	BONNCO INDEX NUMBER
Hand Pad	1055

HEAD PAD UNIT COVERS AND PADS (HPUNIT)

The Head Pad Unit (HPUNIT) is manufactured with Heat Resistant Aramid fabric and a 30 Ounce Needle Felted Flannel. This combo cover/pad is used instead of a metal grid plate, when a softer finish is required.

To order, look at the BONNCO index code number for Master Finish Head Pads (MFHP) and use the letters HPUNIT in front of the BONNCO Index code numbers. For example, our BONNCO Index code number for our MFHP for the Cissell AU-42 is MFHP-21. Our BONNCO Index code number for our HPUNIT head cover for the Cissell AU-42 is HPUNIT-21.

ARAMID HEAD COVERS (HTH)

Our Bonn Aramid Heat-Resistant Head Cover (HTH) is used as a replacement cover on metal grid plates. This tailored three-dimensional Aramid cover will enhance the performance of worn or torn metal grid plates. The high heat resistant material will withstand the toughest of conditions. Its skirted type cover with rods and springs makes it easy to install.

Advantages of using Bonn Head Covers:

- 1) Buttons are protected from hot metal grid plate.
- 2) Nicks on metal grid plate will not be transferred to garments.
- 3) Helps to eliminate shine on garments.
- 4) Helps protect press operator from hot metal grid.

To order, look at the BONNCO index code number for Master Finish Head Pads (MFHP) and use the letters HTH in front of the BONNCO Index code numbers. For example, our BONNCO Index code number for our MFHP for the Cissell AU-42 is MFHP-21. Our BONNCO Index code number for our Aramid Head Cover for the Cissell AU-42 is HTH-21.

INSULATED HEAD SHIELDS

FH Bonn has partnered with Lab Test to bring you patented Insulated Head and Buck covers for your Dry Cleaning Presses as well as Insulated Covers for all Laundry Presses.

Advantages of using Insulated Head Shields:

- Maximizes efficiency of the Pressing Machine because the heat is contained on the pressing surface resulting in drier steam. This translates to better pressing and a higher quality finish.
- By covering all exposed surfaces, the risk of burns is greatly reduced.
- Will not radiate heat to compete with fans or air conditioning, thus saving energy.
- Creates a much better and safer working environment.

Manufacturer and Model Number required when ordering.

This item is a special order item and cannot be included with a stocking order.

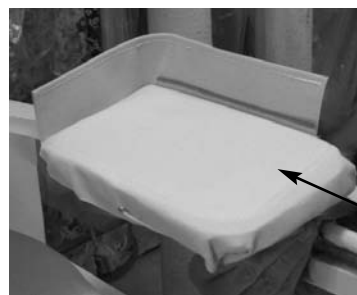

IRON RESTS

Protect your investment! This reliable design keeps the iron securely in place — and your iron shoe is safe from daily wear-and-tear.

- Eliminates damage — prevents costly iron shoe replacement caused by dropping or bumping on unprotected iron stands.
- Heavy-duty material — made from various heat-resistant fabrics.
- Assorted sizes — a variety of sizes fit most iron stands.
